Comments:
I'm writing in opposition to the destruction of over 1/5th of the protected land in this proposal. Also, there are serious issues regarding water tables, flooding, wetland conservation, as well as endangered and rare animal and plant species living in the planned building area. This is quite a surprise since it will not provide much in the way of increased tax revenue or much needed housing in North Grafton. And it has such a negative impact on the water, land and surrounding environment. We already face water, flood, and land issues. There is no reason to add to it with large homes that consume so much. In fact, this is probably the least effective way to address the housing issue in the township. Our neighbors and I will be asking conservation offices and legislators to look into this issue more carefully, along with experts in land policy and management. We do hope you consider that this will be a big problem for the town as the building site is full of challenges, and will negatively impact the existing homes as well.
Sincerely,
Daniela Sharma
