Joe-

Thanks for the update and the firm profile. I read up on them and they seem like a good choice. Please relay to Ashley that OTO will have access to the modelling data in any electronic format that works for them, including the format used to run the modelling software used by Northeast Geotechnical Services

It sounds like tonight will simply be a briefing to the Board as to the status of the Geotech peer review and our presence isn't necessary. That said, we respectfully request the Planning Board continue the Public Hearing to August 12, 2019.

We see the geotechnical discussion being the only remaining item on the docket and agree that on 8/12 things should get wrapped up. We look forward to receiving the final cost estimates.

Thanks,

-Wayne
