Comments: It is imperative that a well vetted traffic study be a part of any plan which would investigate the location of any subject facility. 105 CMR

725.100 (B)(3)(s) carries a requirement for an analysis of projected patient population. This information should be a consideration in determining traffic, parking, and emergency accessibility.

Any intersection within a reasonable proximity of the facilities egress must be afforded ready access to achieving a right of way onto the intersecting roadway.
