To Whom It May Concern,

As a lifelong resident of North Grafton, I am against the the development of 36 single family houses on Wheeler Road.

This space is next to two Grafton Land Trust properties. These spaces are used to protect and maintain the natural habitat and for outdoor recreation. If this housing development is built it will cause harm to many habitats. Noise from the houses, construction and road will misplace wildlife and other organisms that call this space and spaces around it, home. Development of this property will bring harm to our environment.

The development will disturb our water supply and contaminate it. Do you have a plan for this? Contaminated water can cause health problems and they are not easily resolved. Water contamination can be ignored by not allowing this development to be built. By stopping this development we can also stop the residents of Grafton from becoming sick.

This is one of the most beautiful areas in Grafton. I always enjoy driving down Wheeler Road. The best thing about Grafton is that there are still open areas, woods, natural landscape, and trails. I love being a part of a town that has open space! There is so much Native American history in Grafton, and it's preserved through our natural landscape. By destroying a portion of this land, we are destroying our natural history.

I could go on and on about this topic, but I will end here. We have to conserve what makes Grafton beautiful, and this housing development will do the opposite and most importantly it will harm our environment.

Thank you,

Amelia Walters
