Re: Preliminary Subdivision filing for
Land at 88 Adams Road, Grafton, Massachusetts
Assessor's map 32 parcel 10

Dear Board Members:

Enclosed are five full size sets and twelve reduced size sets of revised Conventional Subdivision Plans for this site in Grafton now dated 8-15-2016. The Plans have been revised pursuant to the discussion with the Grafton Planning Board at its meeting on 25 July 2016. At that meeting, a point of discussion was the number of cuts and fills greater than six feet on the previous version of these plans.

We understood our charge to be to reduce or eliminate the cuts and fills greater than 6 feet as much as possible. In response, we have eliminated any fill areas in the proposed roads greater than six feet. There were previously such areas on Road A and Road C.

We have also eliminated the cuts greater than six feet with the exception of three locations. Two are on proposed Road C, in the area of stations 15+00 to 18+00 and as that road approaches the Town Line. The third is Road D which connects to Road C in one of these locations. The locations of these proposed cuts are well outside the 100 foot buffer zone.

If you have any questions, please don't hesitate to contact me. Thank you.

Sincerely,

Thompson-Liston Associates, Inc..

James Tetreault, PE
