Re: Special Use Permit Application- 22 Donahue Lane

Dear Sir or Madam,

During the December 14, 2015 Planning Board Meeting in review of our Special Use Permit Application for 22 Donahue Lane, it was requested that clarification be provided for the proposed traffic in and out of the property on Donahue Lane.

It is anticipated that there will be a pick-up truck that will travel to the property daily. The pickup truck would most likely arrive at the property around 7:00 am weekdays and depart later in the morning. The truck would also return at 3:00 pm weekdays and depart around 3:30 pm.

We do anticipate a piece of heavy equipment being delivered to the property for routine maintenance via a tractor trailer on an unscheduled basis. For estimation purposes, we foresee equipment being delivered and removed from the property one time every eight weeks. Equipment would be delivered most likely mid morning after the rush hour traffic after 10:00 am and we would depart the equipment from our property mid day or in the early afternoon hours prior to 2:00 pm. The arrival and departure of the equipment would most likely not occur on the same day.

At the end of the year, equipment will be stored at the property for the winter so for one day, there may be multiple pieces of equipment delivered within the aforementioned time of day. This would also occur in March for one day when the equipment departs the property for the year.

Very Truly Yours,

Michael Macura Jr.
