Comments:

GEI was on-site to observe the construction status of Phases 4B and 4C. Phase 4B consists of Brookmeadow Lane stations 27+00 to 33+50 and Klondike Road stations 0+00 to 12+76.80 (end). Phase 4C consists of Brookmeadow Lane stations 33+50 to 37+30.60 (end of cul-de-sac). Today, the following was observed:

- Sloped granite edging has been installed at the following locations:
 - Left (north) side of Brookmeadow Lane approximately up to station 31+80
 - Right (south) side of Brookmeadow Lane approximately up to station 34+00
 - Entire length (left and right sides) of Klondike Road with the exception of the length approximately between stations 2+00 and 4+00 (left).
- Curbing was being backfilled with trench spoil (gravel) and compacted on Klondike Road approximately at station 7+00 (left) at the time of my visit.
- Crushing and sorting of material was occurring adjacent to Brookmeadow Lane in Lots 28 and 29.
- The foundation footing for the structure on Lot 27 has been installed.
- The transformer pad and handhole box have been installed on Brookmeadow Lane approximately at station 36+50 (left).

The work observed appeared to be substantially consistent with approved plans.

Action to be Taken:

Grafton Planning Board will be notified of this site visit by way of this report.

CC: Grafton Engineering Department; Doug Brown; P.W. Brown, Inc.; W. Greg Burrill; W.G.B. Construction.
