Hello Natalia,

Thanks for the feedback and sorry for not providing the required information with the application.

Here is the "narrative"

Project – Family Daycare in the existing property which is approved by the building department to the codes. This home daycare got EEC approval and attached the certificate to go on the application if necessary. EEC license renewal is in progress for the next couple of years.

The current capacity of the daycare is a maximum of 6 kids (per day) operating between 7.30 am to 5 pm. No traffic plan to consider as they are not coming all at once, even my driveway is large enough to park 6 cars though. My wife will be the only employee running the daycare.

Just let me know if you need more information

Thanks,

**Jagath**
